2 x mounting screw M4 x 22mm

1 x Long Circus

Mounting

The distance between hole centers shall be 128mm.

You can of course mount your Long Circus where you want. We think it's nice like this: 45mm from the fronts top and 45mm from the fronts side.

TIP! Drill the hole from the outside of the front. Hold a piece of wood tightly against the back of the front for the drill to continue into. This prevents the front from chipping on the inside where the drill comes out.

Drilling guide (not drilling template)
